

## FAIRFIELD, CA - LINEAR STYLE

PRODUCT: UB 24-2

In 1992 the Green Valley housing development was built. DeepRoot UB 24-2 was used to prevent sidewalk damage. The linear application ran the length of the planting strip on both the sidewalk and curb side. In the intervening years the trees have grown substantially, creating a beautiful, shady walkway, with no hardscape damage that would commonly be seen at this point without DeepRoot.
