

LIBRARY PLAZA, WEST PALM BEACH, FL - SURROUND STYLE

PRODUCT: UB 36-2

The West Palm Beach Library Plaza is a project that demonstrates both the practical and aesthetic qualities of trees. DeepRoot UB 36-2 lines the perimeter of the large surround style planting openings. Over the years the trees have developed a cooling shade canopy, providing welcome relief from the hot Florida sun and the DeepRoot has protected the expensive plaza, maintaining a smooth, hazard free surface.
