

# ArborTie®

ArborTie is the best choice for staking and guying trees. Less expensive than traditional wire and hose and gentle on trees, ArborTie is strong enough to resist fierce winds while helping trees develop trunk strength and preventing girdling.

## ArborTie SPECIFICATIONS + FEATURES

### MATERIAL

Flat woven polypropylene (ArborTie Green)  
Flat woven polyester (ArborTie White)

### APPLICATIONS

For staking and guying trees in high wind areas or any trees in need of additional support

### FEATURES

- 3/4" (2cm) wide
- Rounded weave won't damage bark
- Lock stitch won't unravel
- Less expensive than traditional methods of staking and guying
- Made in the USA

### AVAILABLE SIZES

Spool Length	Product Code	Tensile Strength	Carton Contents
100' (30.5m) <b>NEW SIZE</b>	AT 1G (Green)	900lbs. (408kg)	25 rolls
250' (76m)	AT 2G (Green) AT 2W (White)	900lbs. (408kg) 2500lbs. (1134kg)	12 rolls 12 rolls
500' (152.5m)	AT 5G (Green) AT 5W (White)	900lbs. (408kg) 2500lbs. (1134kg)	6 rolls 6 rolls
750' (228.5m) <b>NEW SIZE</b>	AT 7G (Green)	900lbs. (408kg)	4 rolls
3,000' (914.5m)	AT 3MG (Green) AT 3MW (White)	900lbs. (408kg) 2500lbs. (1134kg)	1 roll 1 roll

## APPLICATIONS: STAKING APPLICATIONS: GUYING

ArborTie can be used for any staking application using either a nail or by tying to a "T" stake.

### STAKING DETAIL

Fold ends of ArborTie back. Secure to stake with 1" galvanized roofing nail.

### "T" STAKE DETAIL

#### STEP 1

Tie each end of the ArborTie around the "T" Stake with a rolling hitch (A).

#### STEP 2

Tie off the ends onto the ArborTie that leads to the tree with a hitch (B).

ArborTie can be used for any guying application using ArborKnot™, a tying method that allows the knot to expand as the tree grows, ensuring supportive, girdle-free growth.

This end wrapped around tree after knot is tightened

#### STEP 1

Tie a simple knot 18"-24" (depending on the diameter of tree) from either end of the ArborTie.

#### STEP 2

Wrap this end around tree. Begin a new knot below the knot that was tied in Step 1.

#### STEP 3

Follow motion of ArborTie as shown, finishing the knot by pulling tightly on points A and B at the same time.

#### STEP 4

Slide knot just completed up to the knot tied in Step 1. Fasten free end to stake or anchor.

#### STEP 5

The ArborKnot provides secure, girdle free attachment of the ArborTie to tree.
