

CELEBRATION, FL - LINEAR STYLE

PRODUCT: UB 24-2

Founded in 1994 by the Walt Disney Company, Celebration, Florida is an innovative new town outside Orlando. Project landscape architects EDAW, Inc. and civil engineers PBS & J were concerned over the long term potential for conflict between root growth and sidewalks. The solution was a linear application of DeepRoot UB 24-2 along the length of exposed hardscapes. The linear style planting provides the roots with the maximum available soil volume and the UB 24-2 has prevented any hardscape damage.
